Open your world to Raychem RPG's **Ampact** Tap Connectors

Fired Wedge Connector | Universal Distribution Connector | Mini Wedge Connector

**So, you save time, money
& gain a host of benefits**

Look at the Benefits you reap when select AMPACT connectors...

AMPACT tap connectors use the action of a metal wedge to secure the two conductors to be connected at opposing ends of the C-clamp.

The wedge is inserted at a very high-speed using the AMPACT connector tool.

High-speed insertion is very effective in abrading all sliding surfaces and in disrupting surface oxide film to generate large numbers of contact spots in the electrical interfaces.

What's more,
AMPACT taps can be used to connect
multiple conductor combinations,
It's Boltless and re-usable two-piece connector

Static Discharge Stick

A Static Discharge Stick is a safety tool designed to safely release residual electrical energy from de-energised high and medium-voltage equipment. This includes systems such as capacitors and switchgear, which can retain hazardous charges even after the power is turned off. The primary purpose of the discharge stick is to protect maintenance personnel from electrical shocks by safely redirecting any remaining charge to the ground before work begins.

These sticks are typically made from high-dielectric insulating materials, like fibreglass, to ensure maximum safety. One end of the stick features a metal hook or clamp for attaching to the charged equipment, while the other end is connected to a grounding cable that links to a secure earth point. The discharge stick ensures the equipment is safe to handle during servicing or inspection by providing a controlled route for the static charge to dissipate.

- Foam-filled FRP stick for superior electrical insulation
- Electrolytic-grade copper hook for high conductivity
- TPE-coated copper cable
- Textured finish for better grip
- Cross-dimensional yarn for enhanced mechanical strength and durability
- Heavy-duty grounding clamp
- Insulation tested up to 3100 kv
- Bright orange colour for high visibility
